— STUART PRUNE

Originated by

J. F. STUART, - - Ripon, California

This prune is a cross between the French prune and the Tragedy prune, into the Silver prune, the Silver prune being the mother prune. The market price of this prune this season was 15 cents per pound dried. University test was 53.5 per cent sugar. This prune has a small pit skin same as the French; very fine grain flesh. Processes same as the French prune; drops from the tree and dries very quickly after dipping. Requires very little sugar when cooked.

We have prunes dried in 1914 that are as black as your hat today. Sugar does not appear on the skin with age. The original tree was all cut to pieces for buds last year, and it yielded 45 pounds of green fruit. We got 30 pounds dried that averaged 27 to the pound from the 45 pounds green, only drying away one-third.

Get your orders in early.

We are selling the Stuart prune at from 50 and up, each. Less than 50 trees, . . . Less than 10 trees,

Will send samples of fruit on all orders over 10, or fruit can be seen at this office.

Grafting wood at 25 cents per foot.

— STUART PROLIFIC ALMOND.

One of the heaviest bearers known. Blossoms with the Nonpareil almond. Nut softer than the Drake or Texas. Very prolific bearer, and a big grower.
